Bibliography made with BibTeX, Numerical Examples

You must use 'NumberedRefs' as a document class option to get numbered references. Examples are based on the samples seen in JASA-ReferenceStyles.pdf which you are encouraged to examine and use as a basis for the appearance of your bibliography.

To make example:

pdflatex bibsamp2, bibtex bibsamp2, pdflatex bibsamp2, pdflatex bibsamp2.

See matching entries in samplibbility for examples of making the entries.

NOTE: Click on the citations to go to their referands. Enjoy!
